

Tributyl Tetradecyl Phosphonium Chloride [TTPC]

SYNONYMS:

Tetradecyltributylphosphonium chloride

CAS No: 81741-28-8

MOLECULAR FORMULA: C₂₆H₅₆ClP

OTHER TRADE NAME: Bellacide 350

PROPERTIES:

TTPC biocide is water-based high performing non-oxidative organic biocide. Tributyl tetradecyl phosphonium chloride (TTPC) in water solution, very sharp kill and excellent biofilm-removal effect, overall high performance. Active components, composite biocide containing tributyl tetradecyl phosphonium chloride (TTPC) and best bacteria inhibitory component.

SPECIFICATION:

Appearance	Clear liquid
PH	6 – 8
Density (20° C)	0.95 g/mL

USAGE:

TTPC industrial biocide can be widely used in oilfield, papermaking industry, cooling water system, industrial cleaning water and other industrial water systems to kill microorganism, inhibit the growth of microorganism and clean biofilm.

PACKING

25Kgs net Drum.
